

**ImageCenter™ Training****ImageCenter: An Introduction Overview – eLearning****Course Description**

This seventy-five minute session is an introductory course intended for anyone who needs an understanding of ImageCenter. It covers terms and concepts related to ImageCenter's capture methods, common processing framework, system integration capabilities and available complementary products. The life of an ImageCenter check is reviewed, discussing the process flow of transit checks, inclearings, outgoing returns, and incoming returns using ImageCenter and Jack Henry's Check Image Exchange (Check21) system. The availability of additional resources and training are also covered.
