

Gladiator® IT Regulatory Compliance Webcast Series 2017

This year's webinar series is based on the latest regulatory guidance, best practices, and industry standards and is brought to you in a convenient, on-demand webcast format. Each informative webcast will be hosted by a Gladiator IT Regulatory Compliance (ITRC) department team member. This on-demand webcast format offers your financial institution multiple benefits by providing time-efficient information that may be shared with other employees within your institution and played on-demand as schedules permit. Upon request, these webcasts can be made available to non-Compliance Package customers as well, at a nominal cost of \$95 per session.

Note that while webcasts will be provided on a quarterly basis, the actual title, description, and subject matter expert presenter(s) will be announced the quarter the webcast will become available. This allows Gladiator the flexibility to provide you with timely risk and compliance topics that address current questions and concerns facing community FIs.

Improving Cyber Resilience: Implementing the Top FFIEC IS Handbook Requirements in 2017

March 9, 2017
