

AUTOMATE YOUR LOAN RENEWALS

(Before New Business Slips Away)

Estimates indicate that nearly 50% of loan transactions processed by your lending staff each year are related to renewals. Unfortunately, none of that time and effort contributes to new revenue for your institution. And in the meantime, potential new business may be heading elsewhere.

Why spend more time on commercial loan renewals than you have to?

Automating the commercial loan renewal process can save your team significant time that can be better spent building relationships and generating new business. With the **Commercial Lending Center Suite™** from ProfitStars®, **you can automate...**

- **The maturity report**, so you know which loans are up for renewal.

- **Requests for updated financials** sent to the client.

- **File review and approval** with convenient renewals status updates **automatically sent to your client.**

- **Digital signatures**, which enable clients to digitally sign documents right before the system files them in the repository.

- **Updating of loan information**, which is then sent to the **Commercial Lending Portfolio Management Center™** and your core platform.

To learn how this fully-digital commercial lending lifecycle solution can empower your lenders to better serve clients, drive new revenue, and generate business borrowers for life, simply contact us below to request more information today.
